Profile

Engineer with 2+ years of experience shipping LLM-based tools for clients, mostly in Python. I have built retrieval (RAG) pipelines, chart-image analysis, voice agents and transcript-to-JSON generators. A big part of my job is debugging: tracing why a pipeline or a generated piece of code fails, and checking model output before it goes live.

Skills

Languages: Python, JavaScript, React
ML / LLM: LLM APIs, RAG, embeddings, semantic search, prompt design, structured output with JSON schemas, image analysis, Vapi.ai
Tools: n8n (self-hosted), Make.com, Airtable, HubSpot, Twilio, Google Sheets, WhatsApp, REST APIs, webhooks

Experience

Automation Engineer, Etherwise (etherwise.io), Remote Nov 2024 - Present

- Own all n8n work at the company and share Make.com delivery for international clients.
- Use coding assistants daily, then test and fix their code before it reaches a client.

Full Stack Developer, Etherwise, Remote May 2024 - Nov 2024

- Built web apps and API integrations in JavaScript and React.

Full Stack Developer, Micro1, Remote Mar 2024 - Jul 2024

Projects

SHIPPED FOR CLIENTS AT ETHERWISE

Self-Hosted n8n Platform n8n, Ubuntu, Cloudflare Tunnel — Etherwise

- Set up and run the company's own n8n server; every n8n workflow in production is built and maintained by me.
- Built cross-scenario error monitoring in Make.com so broken runs get flagged before the client notices.

Therapy Provider Operations Make.com, webhooks, REST APIs — US healthcare client

- Part of the team running a 200+ scenario Make.com setup covering patient intake, staff workflows and alerts.
- Handle fixes, monitoring and error handling, tracked sprint by sprint in hours reports for the client.

CRM and Phone System Sync HubSpot, Dialpad — German client

- Built the sync between HubSpot and Dialpad for a company-formation service.

Field Inspection Pipeline GoCanvas, Airtable, JavaScript — Client

- Split multi-part GoCanvas form submissions into clean Airtable records; wrote an editable Airtable script for defect-check reports.

After-Hours Lead Chat ManyChat, LLM API — Client

- LLM chat flow that answers and qualifies leads outside working hours.

Content Ops Automation Make.com, Google Sheets, Slack — CashSwipe

- Runs a content team's pipeline from one Google Sheet hub and Slack notifications.

MY OWN BUILDS

Document Q&A with RAG Python, embeddings, vector search — Feb 2025 - Present

- Wrote the full pipeline: ingestion, chunking, embeddings and semantic search; tuned retrieval and prompts for faster, more relevant answers.

Stock Chart Analyzer on WhatsApp Python, image analysis — Jan 2025 - Feb 2025

- Send a chart screenshot, get back detected candlestick patterns plus live market context and a one-line verdict.

Voice Agents Vapi.ai, Twilio, Make.com, React — Mar 2025 - May 2025

- Phone agents for insurance sales, booking and high-volume outbound calls, with lead qualification and warm transfer to a human.

Marketing Deck Generator LLM, JSON Schema — Nov 2024 - Dec 2025

- Turns a discovery-call transcript into schema-checked JSON that fills a 27-slide deck, plus posts and emails.

Student Avatar Platform real-time video streaming — Jul 2025 - Aug 2025

- Students talk to a live video avatar that answers from their own academic and activity records.

Earlier

Intern, Transtech Solutions, Ahmednagar (Apr 2020 - Jul 2020): built a desktop CRUD app for government national ID records.

Freelance websites: Arihant Sales Corporation (Nov 2022 - Jan 2023), Bhakti Builders (Jun 2019 - Jul 2019)

Languages: English, Hindi, Marathi
